Introducing TELUS PureFibre

the future is friendly®

What is TELUS PureFibre?

TELUS PureFibre is the #1 internet technology for speed and reliability. The network is built from flexible, transparent strands of glass that are slightly thicker than human hair. Sending data as particles of light, this allows large volumes of information to be sent to your home or business at lightning-speed.

What are the advantages of TELUS PureFibre?

Increased property values

Recent research, provided by Fiber to the Home Council Americas, from a sample of U.S. home values summarized in the study 'What Fiber Broadband can do for your Community' – that property values have been shown to increase by \$5,000 - \$8,000 in value when homes are connected to a 100% fibre network. With speed and reliability becoming increasingly important to consumers, a Fibre connection can help make a property more attractive for prospective tenants.*

Lightning-fast Internet speeds

TELUS PureFibre is the #1 internet technology for speed and reliability. Plus, you'll get equal upload and download speeds. †

4x the resolution of HD

The only provider in Western Canada to offer 4x the intensity with Optik TV® 4K. †

What to expect.

At TELUS, we are committed to improving the lives of Canadians and communities. We work as a team to deliver on our promises.
