

WORKSHOP

RENTAL ASSISTANCE CALCULATOR / OTHER FCHI-2 UPDATES

The introduction of the Agency's online FCHI-2 Calculator meant that housing co-ops had to file their rental-assistance reconciliation online. The online filing is an absolute requirement, with no exceptions. As a result, we have been offering online webinars to help housing co-op with the transition. This workshop will provide you an overview of how to use the calculator and answer any questions you have about the tool.

The Agency for Co-operative Housing: New Rental Assistance Calculator.

- Replaces the Excel worksheet from CMHC
- Helps co-ops in the Rental Assistance Program (FCHI-2) calculate assisted charges, track total use of assistance, and submit year-end reconciliation.

Co-operatives participating in the CMHC's FCHI-2 program are also required to prepare and submit a three-year action plan within twelve months of the agreement effective date. Each year, the co-operative must report its progress against the plan. During this workshop, we will review sample plans and we are available to assist and support your housing co-op to develop your plans.
